

The background of the entire image is a dark blue space filled with a network of glowing blue lines and nodes, resembling a blockchain or digital network. On the left side, there is a futuristic cityscape with several tall, rectangular buildings that have a grid-like pattern on their facades and are illuminated with a greenish-blue light. The overall aesthetic is high-tech and digital.

WHAT IS A **BITCOIN CASH?**

Bitcoin Cash (BCH) is a cryptocurrency that shares many of the same characteristics as Bitcoin (BTC) yet also integrates a number of changes and features that set it apart. It is considered a 'fork' of Bitcoin, although proponents argue that Bitcoin Cash more closely adheres to the original vision of creating a peer-to-peer electronic cash system as laid out in a 2008 [white paper](#) written by the founder of the protocol, a person or group going by the pseudonym Satoshi Nakamoto.

THE BEST **MONEY IN THE WORLD**

Bitcoin Cash Brings Sound Money To The World, Fulfilling The Original Promise Of Bitcoin As "Peer-to-peer Electronic Cash". Merchants And Users Are Empowered With Low Fees And Reliable Confirmations. The Future Shines Brightly With Unrestricted Growth, Global Adoption, Permissionless Innovation, And Decentralized Development.

All Are Welcome To Join The Bitcoin Cash Community As We Move Forward In Creating Sound Money Accessible To The Whole World.

WHY USE BITCOIN CASH

➤ **Send Money Anywhere In the World, Almost for Free**

With Bitcoin Cash, you can send money to anyone, anywhere in the world, 24 hours a day, 365 days a year. Like the Internet itself, the network is always on. No transaction is too big or too small. And you never need anyone's permission or approval.

➤ **Be Your Own Bank and Have Full Control Over Your Money**

The seizing of capital from account holders ("bail-ins") that occurred in Cyprus and nearly in Greece, demonstrated that bank deposits are only as safe as political leaders decide. Even under the best of conditions, banks can make mistakes, hold funds, freeze accounts, and otherwise prevent you from accessing your own money.

Banks can also decide to block your transactions, charge you fees, or close your account without warning. Bitcoin Cash gives you full, sovereign control over your funds, which you can access from anywhere in the world.

➤ **A Scarce Digital Currency with a Known, Fixed Supply**

The Bitcoin Cash protocol ensures there will never be more than 21 million coins in existence. Governments constantly print money out of thin air, endlessly inflating the supply and devaluing everyone's savings. Bitcoin Cash has a fixed supply and therefore represents sound money.

➤ **Increase Your Privacy and Operate Anonymously**

Bitcoin Cash offers more privacy and anonymity than traditional payment systems like bank transfers and credit card payments, since it's normally impossible to know who controls a Bitcoin address.

Bitcoin Cash offers various levels of privacy depending on how it is used. It's important to educate yourself thoroughly before using BCH for privacy purposes.

WHY USE BITCOIN CASH

➤ **Enjoy Exclusive Discounts**

Many merchants offer discounts for paying in Bitcoin Cash, because it eliminates credit card fees and helps grow the adoption of this new payment system.

➤ **Token Ecosystem**

Storing and managing tokens on a blockchain provides greater transparency and integrity than traditional forms of asset accounting and trading. Bitcoin Cash supports token protocols that power a variety of projects, and it is easy to create your own token backed projects.

➤ **Support Freedom Worldwide**

Bitcoin Cash is a permissionless, open network. It empowers you to engage with your fellow human beings without intrusion. It's decentralized, voluntary, and non-aggressive. As usage grows, old power structures will erode while fresh ideas blossom. It may help usher in the greatest peaceful revolution the world has ever known.

➤ **Defi Applications & NFTs**

SmartBCH is a highly performant EVM & Web3 compatible sidechain to support DeFi applications. This includes a constantly growing number of decentralized exchanges and NFT projects!

BENEFITS OF MERCHANTS

✓ **Ultra Low Fees**

The network fee for a typical Bitcoin Cash transaction is less than one penny. If you want to convert your BCH into fiat currency, such as US dollars, you can do that through merchant processors for a cost that is still much lower than credit card processing.

✓ **No Chargebacks**

Unlike credit cards, there are never any automatic voids, refunds, chargebacks, or other unexpected fees. Fraud protection is built into the system with no cost to the merchant.

✓ **New Customers**

A growing number of patrons are choosing Bitcoin Cash as a preferred payment method. They favor merchants who offer this payment option and actively seek them out.

✓ **Free Marketing and Press**

By accepting Bitcoin Cash, merchants can gain free listings in website and app directories, gaining even more customers. They can also take advantage of this new trend and generate press for their business.

HISTORY OF BITCOIN CASH

In October 2008, Satoshi Nakamoto published the famous whitepaper entitled Bitcoin: A Peer to Peer Electronic Cash System. In 2009, he released the first bitcoin software that powered the network, and it operated smoothly for several years with low fees, and fast, reliable transactions.

Unfortunately, from 2016 to 2017, Bitcoin became increasingly unreliable and expensive. This was because the community could not reach consensus on increasing the network capacity. Some of the developers did not understand and agree with Satoshi's plan. Instead, they preferred Bitcoin become a settlement layer.

By 2017, Bitcoin dominance had plummeted from 95% to as low as 40% as a direct result of the usability problems. Fortunately, a large portion of the Bitcoin community, including developers, investors, users, and businesses, still believed in the original vision of Bitcoin -- a low fee, peer to peer electronic cash system that could be used by all the people of the world.

On August 1st, 2017, we took the logical step of increasing the maximum block size, and Bitcoin Cash was born. Anyone who held Bitcoin at that time (block 478558) became an owner of Bitcoin Cash (BCH). The network now supports up to 32MB blocks with ongoing research to allow massive future increases.

WHAT IS A **SMART CONTRACT** ?

A Smart Contract Is An Algorithm Within A Cryptocurrency's Blockchain. In Our Case, TRON Is Our First Choice Among Those On Which It Is Possible To Create Smart Contracts. The Main Purpose Of Such Contracts Is The Automation Of The Relationship, The Opportunity To Make A Commitment Self-executing.

WHAT IS **DECENTRALIZATION** ?

It is a system in which there are no admins, there is no single server or system monitoring, project management. The creators of the platform are the same project participants as you.

OUR VISION

To Connect People Around The World With One Another And Empower The Life Of Millions Of Individuals By Providing Financial Help. Everyone Deserves A Better Life, And They Should Have It Now And Bitcoin Cash Is Here To Ensure It With The Unique Auto Matrix Programmed. We Want To Bring World Together Without Any Currency Barrier And Border. We Also Aim To Create A System For Passive Income Where No One Is In Control And The Code Does Everything Auto, On A Platform That Can Not Be Hacked Or Changed.

WHY CHOOSE US

With referral program where you can earn just by referring someone who will become our members, the feature home based system.
